10th | Ssc | Percentage: 80.60 / 100

PROJECTS

Hotel Management System

Designed and developed a comprehensive Hotel Management System aimed at automating operations, improving customer service, and optimizing resource management. The system incorporates various modules for room bookings, guest check-in/check-out, billing, inventory management, complaint management, and feedback collection.

Student Council Management System

Designed and developed a web-based Student Council Management System to automate and manage student council activities, including elections, event coordination, and communication between students and council members. The system provides role-based access for administrators, council members, and students to ensure transparency and efficient management.

Assured Contract Farming System for Stable Market Access

Developed a digital platform that helps farmers and buyers create clear and reliable farming agreements. The system ensures farmers get a stable market to sell their produce, while buyers can secure good-quality crops in advance. It includes features for creating contracts, tracking progress, and solving any issues that may come up, making the farming process more fair, transparent, and efficient for both sides.
